Section 2: Company Overview Section

Headline: 12+ Years, One Standard

Sub-Headline: Twelve years, one grade promise kept every time - the short version of how Bharat Stainless Steel Industries got here.

Body: Bharat Stainless Steel Industries has manufactured stainless steel pipes, coils, and sheets in Hisar, Haryana since around 2010, growing to serve 650+ customers across 210+ cities, producing 5,500+ MT annually, sourced from Jindal Stainless and directed by Subhash Chander Kulchania and Devanand Kulchania.

That growth came from traders and fabricators returning order after order, because the grade and finish they were quoted is the grade and finish that showed up on the truck.

Twelve years in an industry where suppliers come and go isn't just a stat, it's the kind of long-haul supply relationship a growing business, whether a trader building repeat stock or a fabricator scaling project work, can actually plan around.

Section 3: Founder / Director's Message

Headline: From the Directors' Desk

Sub-Headline: Why reliability isn't a slogan at Bharat Stainless Steel Industries - straight from the people who built the company on it.

Body: Bharat Stainless Steel Industries was built on a simple idea: a stainless steel supplier should be as reliable as the material it sells. Under the direction of Subhash Chander Kulchania and Devanand Kulchania, that idea has shaped how we operate day to day - sourcing consistently from Jindal Stainless, weighing every dispatch on our own weighbridge, and answering enquiries fast because a delayed reply can hold up someone's entire project.

We've seen suppliers in this industry cut corners on grade, on weight, on response time - and we've built BSSI specifically to not be that. Every order, big or small, gets the same standard.

Twelve years and 650+ customers later, that's still the standard we hold ourselves to.

Section 4: Manufacturing Process

Headline: How We Manufacture - Coil to Finished Product

Sub-Headline: How raw Jindal-sourced coil becomes a finished, weighbridge-verified pipe, coil, or sheet - start to finish.

Body: Raw stainless steel coil is sourced from Jindal Stainless and processed at our Hisar unit into pipes (round, square, rectangular, oval, slotted, NB tube), coils (including slitting and cut-to-length), and sheets, finished to standard 2B Prime unless a different finish is requested.

Every dispatch is weighed on our Dharam Kanta (weighbridge) before billing, so the invoice reflects actual delivered weight rather than theoretical calculation.

Step 1: Sourcing
Raw stainless steel coil is sourced directly from Jindal Stainless in 200, 300, and 400 series grades - the same starting material across every product we manufacture.

Step 2: Cutting & Forming
Coil is processed at our Hisar unit into pipes (round, square, rectangular, oval, slotted, NB tube) through ERW, welded, or OD construction, depending on the product.

Step 3: Slitting & Cut-to-Length
For coil and sheet orders, material is slit to your required width or cut to your exact length in-house — no separate vendor, no added lead time.

Step 4: Finishing
Every product is finished to standard 2B Prime unless a different finish is requested, giving a consistent, smooth, industry-standard surface across the batch.

Step 5: Weighbridge Verification
Before any order leaves our unit, it's weighed on our own Dharam Kanta - so the invoice reflects actual delivered weight, not a theoretical calculation.

Step 6: Dispatch
Confirmed, weighed, and finished - the order is dispatched ex-works or FOR, based on what you've chosen at confirmation.

Section 5: Quality & Certifications

Headline: What We're Certified For - and What We're Not

Sub-Headline: What Bharat Stainless Steel Industries can prove today, and what we won't claim until it's confirmed.

Body: Bharat Stainless Steel Industries is GST registered (GSTIN 06AZBPD9705B1ZW) and MSME registered - both verifiable on request. Raw material is sourced from Jindal Stainless.

We do not currently hold ISO 9001 certification, and we do not currently issue Mill Test Certificates (MTC) per order. We'd rather state that plainly than claim a certification we can't back up.

Section 6: Why Choose Us

Headline: Why Buyers Choose Bharat Stainless Steel Industries

Sub-Headline: Every trust signal Bharat Stainless Steel Industries has earned in 12+ years, laid out in one place for a quick decision.

Body: 12+ years in business · 650+ customers · 5,500+ MT produced annually · 210+ cities served · Jindal-sourced material · GST + MSME registered · based in Hisar's industrial hub**.**

Section 7: FAQs

Headline: Frequently Asked Questions

Sub-Headline: The questions procurement teams and fabricators ask us most, before they place their first order.

Body:

FAQs 1: When was Bharat Stainless Steel Industries founded?
Answer: Around 2010 - 12+ years of continuous operation in Hisar, Haryana.

FAQs 2: Who leads Bharat Stainless Steel Industries?
Answer: Subhash Chander Kulchania and Devanand Kulchania.

FAQs 3: Does Bharat Stainless Steel Industries hold ISO or MTC certification?
Answer: No, not currently for either. We state this plainly rather than imply a certification we don't hold.

FAQs 4: If you don't have ISO certification, how do I know your quality is consistent?
Answer: Our consistency comes from sourcing exclusively from Jindal Stainless and weighbridge-verifying every dispatch, not from a certification badge. If a formal quality certification is a hard requirement for your procurement process, tell us upfront and we'll be direct about whether we can meet that requirement.

Section 8: Bottom CTA

Headline: Questions About Us?

Sub-Headline: Just Ask.

CTA: Talk to Us on WhatsApp - we usually reply within two hours.
