Section 2: Overview

Headline: The One Pipe Where a Single Measurement Decides Fit

Subheadline: NB tubes from Bharat Stainless Steel Industries are confirmed against your drawing before manufacturing, because NB and OD look interchangeable on paper and aren't on delivery.

Body: Bharat Stainless Steel Industries manufactures stainless steel NB (Nominal Bore) tubes in 200, 300, and 400 series grades, ERW/welded/OD construction, 0.3mm to 8mm thickness, 6mm up to 12 inch NB size, standard 2B Prime finish - used in process piping, instrumentation lines, and equipment manufacturing.

NB tubes are specified by an approximate internal-diameter naming convention, commonly used where precise internal flow diameter matters more than outer dimension.

Bharat Stainless Steel Industries, a stainless steel tube manufacturer in Hisar, Haryana, supplies NB tubes with same-day WhatsApp pricing.

NB and OD are the two measurements buyers most often confuse on this product - NB is a naming convention for approximate internal diameter, while OD is the actual measured outer diameter. Getting this wrong on an order causes a real fitting mismatch downstream, so we confirm which measurement your drawing specifies before manufacturing begins, every time.

Section 3: Spec Table

Headline: NB Tube Specifications

Sub-headline: Full technical range at a glance - thickness, size, grade, type, and finish, confirmed before every order.

Spec	Detail
Thickness	0.3mm – 8mm
Size	6mm – 8 inch, 10 inch, 12 inch (NB range)
Grade	200, 300, 400 series
Type	ERW, Welded, OD pipes
Finish	2B Prime

Quick terms:

- ***NB*** = Nominal Bore, an approximate internal-diameter measurement
- **OD** = Outer Diameter, the actual measured outside width
- **2B** = the standard smooth, matte cold-rolled finish
- **ERW** = Electric Resistance Welded construction.

Section 4: Why Bharat Stainless

Headline: Where We Catch the NB vs OD Mistake Before It Ships

Subheadline: Where Bharat Stainless Steel Industries catches the mistake before it becomes a reorder.

Body: NB tube is the product where a single measurement misunderstanding - NB vs OD - causes the most real-world fitting problems in this industry, so BSSI treats confirming that measurement as a standard step on every order, not something we assume the buyer already has right. Sourced from Jindal Stainless, weighbridge-verified before dispatch.

12+ years supplying pharma, chemical, and instrumentation buyers has taught us that a five-minute confirmation call before manufacturing saves a much more expensive reorder after delivery.

Section 5: Applications

Headline: Applications

Subheadline: Where Bharat Stainless Steel Industries NB tube actually gets used.

Body: Pharmaceutical equipment lines · chemical plant piping · heat exchanger tube assemblies · generalmachinery and equipment fabrication specified "as per drawing," where exact NB sizing against the buyer's engineering spec is critical.

Section 10: FAQs

Headline: Frequently Asked Questions

Sub-headline: What NB tube buyers usually ask before ordering.

Body:

FAQs 1: What does NB mean in stainless steel tubes?
Answer: NB stands for Nominal Bore - an approximate internal-diameter classification used in process and instrumentation piping, distinct from OD (Outer Diameter), the actual measured outside dimension. We confirm which one your drawing specifies before quoting.

FAQs 2: Are NB tubes suitable for pharmaceutical or food-grade use?
Answer: Yes, in 300-series (SS 304/316) grade with standard 2B Prime finish, NB tubes are commonly used in pharma and food processing lines because of corrosion resistance and a hygiene-friendly surface.

FAQs 3: Can I get a Mill Test Certificate (MTC) for NB tubes?
Answer: We currently don't offer MTC as standard - message us your requirement and we'll confirm what documentation we can offer for your specific order.

FAQs 4: How can I be sure NB and OD won't get mixed up on my order?
Answer: We confirm the measurement type directly with you before manufacturing starts - if your drawing specifies NB, we manufacture to NB; if OD, we manufacture to OD. This confirmation step is standard on every NB tube order, not optional.
