Section 2: Overview

Headline: The Shape Fabricators Choose for Looks, Not Just Load

Subheadline: Oval pipe from BSSI holds a consistent 2B finish end to end, because a railing people can see is judged differently than a beam they can't.

Body: Bharat Stainless Steel Industries manufactures stainless steel oval pipes in 200, 300, and 400 series grades, ERW/welded construction, standard 2B Prime finish, sized to your required oval profile - supplied from our Hisar, Haryana unit for railing, furniture, and architectural fabrication buyers.

Oval pipes give fabricators a distinctive profile for railings, handrails, and decorative furniture, while retaining the strength and corrosion resistance of standard stainless steel grades.

Bharat Stainless Steel Industries supplies stainless steel oval pipes from Hisar with same-day WhatsApp pricing for buyers across Haryana and beyond. Because oval pipe is used almost exclusively in visible, finish-sensitive applications, a consistent 2B finish across the full length of the pipe matters more here than raw strength alone.

We hold that finish standard whether it's a small batch for a single staircase or a bulk order for a furniture manufacturer's production run.

Section 3: Spec Table

Headline: Oval Pipe Specifications

Sub-headline: Full technical range at a glance - thickness, size, grade, type, and finish, confirmed before every order.

Spec	Detail
Thickness	0.3mm – 8mm

Size	As per required oval profile
Grade	200, 300, 400 series
Type	ERW, Welded pipes
Finish	2B Prime

Quick terms:

- ***2B*** = the standard smooth, matte cold-rolled finish
- **ERW** = Electric Resistance Welded construction.

Section 4: Why Bharat Stainless

Headline: Why Bharat Stainless Steel Industries

Subheadline: Why appearance-first buyers choose Bharat Stainless Steel Industries for oval pipe.

Body: Oval pipe is ordered almost entirely for how it looks, not just how it performs, which is why Bharat Stainless Steel Industries holds a consistent 2B finish across the full length of every pipe, not just the visible ends of a sample piece. Sourced from Jindal Stainless, weighbridge-verified before dispatch.

12+ years supplying decorative and architectural fabricators has taught us that a finish that looks right in showroom light but shows inconsistency once installed is thesingle most common complaint on this product - we build to avoid that, batch after batch.

Section 5: Applications

Headline: Applications

Subheadline: Where Bharat Stainless Steel Industries oval pipe actually gets used.

Body: Steel furniture manufacturing · decorative elevator fittings · architectural and interior fabrication, where the pipe's oval profile is a deliberate design element rather than a hidden structural component.

Section 10: FAQs

Headline: Frequently Asked Questions

Sub-headline: What oval pipe buyers usually ask before ordering.

Body:

FAQs 1: What is a 2B finish in stainless steel?
Answer: 2B is a smooth, matte-reflective, cold-rolled finish, chemically pickled and skin-passed - the standard finish for most stainless steel pipes, coils, and sheets, including our oval pipes.

FAQs 2: What finish do oval pipes come in?
Answer: Standard 2B Prime finish - smooth, mattereflective grey. Let us know if your project needs a different finish and we'll confirm availability.

FAQs 3: Are oval pipes suitable for outdoor railings?
Answer: Yes, particularly in SS 304 grade, which handles outdoor moisture and weather exposure significantly better than SS 202 over a multi-year installation.

FAQs 4: What sizes of oval pipe do you stock?
Answer: Sizing depends on current stock and your exact profile requirement - message us on WhatsApp with your specification.

FAQs 5: Will the finish look the same across the whole batch, or can pieces vary?
Answer: We hold consistent 2B finish across a full order, not just the sample. If you're ordering for a visible installation (railing, furniture), tell us that upfront and we'll flag it as a finish-priority order internally.
