Section 2: Overview

Headline: Slit to Width, Before It Ever Reaches Your Shop Floor

Subheadline: Bharat Stainless Steel Industries slits master coil to your exact width in-house, so smaller workshops without slitting equipment don't have to turn a job down.

Body: Bharat Stainless Steel Industries offers stainless steel slit coil / SS coil slitting services in 200, 300, and 400 series grades, slitting master coils (up to 1250mm) down to the exact width fabricators and OEMs need - slit in-house at our Hisar, Haryana unit.

For a fabrication workshop, ordering a full-width master coil and slitting it yourself means extra machine time, extra scrap, and a strip width only as accurate as your own cutting setup. Ordering pre-slit coil from us removes that step - you tell us the width, grade, and thickness, and we slit to spec before dispatch.

This is especially useful for smaller fabricators who don't have heavy slitting equipment on-site but still need strip-width consistency across a batch.

Section 3: Spec Table

Headline: Slitted Coil Specifications

Sub-headline:

Spec	Detail
Grade	200, 300, 400 series
Thickness	0.2mm – 5mm
Slit Width	As per requirement (up to 1250mm master width)
Finish	2B Prime

Quick terms:

- ***2B*** = the standard smooth, matte cold-rolled finish.

Section 4: Why Bharat Stainless

Headline: Why Bharat Stainless Steel Industries

Subheadline: Why Smaller Workshops Rely on Bharat Stainless Steel Industries's Slitting Service

Body: A large share of our slitted-coil buyers are MSME workshops without heavy slitting equipment of their own - for them, this service isn't a convenience, it's the difference between taking on a job or turning it down.

Bharat Stainless Steel Industries slits every coil to your specified width and confirms actual delivered weight on the weighbridge before dispatch, so there's no billing surprise waiting when the material arrives.

12+ years slitting coil for handrail, furniture, and machinery fabrication has taught us that consistency across a batch - not just the first piece - is what actually saves a fabricator time on the shop floor.

Section 5: Applications

Headline: Applications

Subheadline: Where Bharat Stainless Steel Industries slit coil actually gets used.

Body: Steel furniture manufacturing, where consistent strip width means less trimming before welding · automobile machinery accessories needing a specific, repeatable width across a production run · elevator fittings · general structural fabrication where a project calls for a width standard master coils don't come in.

Section 10: FAQs

Headline: Frequently Asked Questions

Sub-headline: What slit coil buyers usually ask before ordering.

Body:

FAQs 1: What is SS coil slitting?
Answer: Cutting a wide master coil into narrower strips of a specified width, so fabricators get ready-to-use strip without re-cutting on-site - common for workshops without heavy slitting equipment.

FAQs 2: Can I get a custom width for slitted coil?
Answer: Yes - message your grade, thickness, and required width on WhatsApp for a quote

FAQs 3: Do you provide SS coil slitting in Haryana?
Answer: Yes, done in-house at our Hisar unit, serving fabricators and traders across Haryana and beyond

FAQs 4: What grades are available in slitted coil?
Answer: 200, 300, and 400 series - including 202, 304, 304L, 316, 316L, 409, and 430 - all in standard 2B Prime finish.

FAQs 5: Will slit width stay accurate across a large batch, not just the first few pieces?
Answer: Yes - we hold width tolerance consistently across the full slit run, since inconsistency midbatch is exactly the problem this service exists to prevent.
