Section 2: Overview

Headline: Slotted to Your Spec, Not Pulled Off a Shelf

Subheadline: Bharat Stainless Steel Industries cuts every slot pattern to your submersible pump, filtration, or drainage requirement — because a slot spec that's slightly off costs you a replacement, not just a delay.

Body: Bharat Stainless Steel Industries manufactures stainless steel slotted pipes in 200, 300, and 400 series grades, ERW/welded construction, 0.3mm to 8mm thickness, 6mm up to 12 inch size, slotted to your specified pattern and spacing - used primarily in submersible pump, filtration, and drainage applications.

Slotted pipes are used where controlled flow, filtration, or screening is required - common in submersible pump assemblies, filtration systems, and drainage lines, where slots cut into the pipe wall serve a specific functional purpose rather than a decorative one.

As a stainless steel slotted pipe manufacturer near Hisar, Bharat Stainless Steel Industries builds these to the same grade standards as our standard round pipes, working from your slot pattern and spacing requirement rather than a fixed catalog size.

Section 3: Spec Table

Headline: Slotted Pipe Specifications

Sub-headline: Full technical range at a glance - thickness, size, grade, type, and finish, confirmed before every order.

Spec	Detail
Thickness	0.3mm – 8mm
Size	6mm – 8 inch, 10 inch, 12 inch

Grade	200, 300, 400 series
Type	ERW, Welded pipes, slotted as per requirement
Finish	2B Prime

Quick terms:

- ***2B*** = standard smooth, matte cold-rolled finish
- **ERW** = Electric Resistance Welded construction
- **OD** = Outer Diameter, the actual measured outside width.

Section 4: Why Bharat Stainless

Headline: Why Bharat Stainless Steel Industries

Subheadline: Why precision matters more on this product than almost any other.

Body: Slotted pipe is ordered to solve a specific functional problem - controlled flow, filtration, or screening - which means getting the slot pattern and spacing exactly right matters more than almost anything else on this product.

Bharat Stainless Steel Industries manufactures to your specified slot spec rather than a generic standard, sourced from Jindal Stainless and weighbridge-verified before dispatch.

12+ years supplying submersible pump and filtration-line buyers has shown us that a slot spec that's slightly off can mean the difference between a component that works and one that needs replacing within months.

Section 5: Applications

Headline: Applications

Subheadline: Where Bharat Stainless Steel Industries slotted pipe actually gets used.

Body: Submersible pump components · chemical plant filtration lines · structural/process fabrication for rice mill, paper mill, and sugar mill industries, where slotted pipe handles a functional flow or screening role standard round pipe can't.

Section 10: FAQs

Headline: Frequently Asked Questions

Sub-headline: What slotted pipe buyers usually ask before ordering.

Body:

FAQs 1: What is a slotted pipe used for?
Answer: Commonly used in submersible pump assemblies, filtration systems, and drainage applications, where the slots allow controlled fluid flow while filtering out solids - a function standard unslotted round pipe can't perform.

FAQs 2: Can slot size and spacing be customized?
Answer: Yes - share your application requirement and drawing on WhatsApp, and we'll confirm slot size, spacing, and pattern feasibility before manufacturing.

FAQs 3: Which grade is best for submersible pump use?
Answer: SS 304 or SS 316 (300-series) is typically preferred because of sustained water exposure - we advise the exact grade based on water type (fresh, saline, chemical).

FAQs 4: What if the slot spec I need isn't something you've made before?
Answer: Tell us the application and the flow/filtration requirement, not just a slot number - we'll confirm feasibility before committing to an order, rather than promising a spec we haven't actually verified we can produce.

Section 11: Bottom CTA

Headline: Not Sure If We've Made Your Spec Before? Ask.

Sub-headline: Not sure if we've made your slot spec before? Message us your application - we'll confirm feasibility.
