Section 2: Overview

Headline: Built to Hold a Straight Line - Batch After Batch

Subheadline: Square and rectangular pipe from Bharat Stainless Steel Industries, sized 6mm to 12 inch cross-section in 200/300/400 series - Hisar-manufactured for fabricators who can't afford a frame that's off by a millimetre.

Body: Bharat Stainless Steel Industries supplies stainless steel square and rectangular pipes in 200, 300, and 400 series grades, ERW/welded/OD construction, 0.3mm to 8mm thickness, sized 6mm up to 12 inch (cross-section), in standard 2B Prime finish, manufactured at our Hisar unit for structural, furniture, and fabrication buyers across Haryana and 210+ cities.

Built for fabricators making handrails, furniture frames, and structural components where flat, straight edges matter for clean welding and finishing.

Searching for a stainless steel rectangular pipe manufacturer in Haryana? Bharat Stainless Steel Industries supplies with sameday WhatsApp pricing rather than a quote you wait days for.

Square and rectangular pipe is the backbone of most structural and framing fabrication work - gates, staircases, furniture frames, and machinery bases all depend on consistent wall thickness and corner strength across the full order. Because these pipes are usually welded or bolted directly into a larger structure, a batch with inconsistent thickness can throw a frame's alignment off in a way that's hard to correct after the fact.

Section 3: Spec Table

Headline: Square & Rectangular Pipe Specifications

Sub-headline: Full technical range at a glance - thickness, size, grade, type, and finish, confirmed before every order.

Spec	Detail
Thickness	0.3mm – 8mm
Size	6mm – 8 inch, 10 inch, 12 inch (cross-section range)
Grade	200, 300, 400 series
Type	ERW, Welded, OD pipes
Finish	2B Prime

Quick terms:

- ***2B*** = standard smooth, matte cold-rolled finish
- **ERW** = Electric Resistance Welded construction
- **OD** = Outer Diameter, actual measured outside width

Section 4: Why Bharat Stainless

Headline: Why Fabricators Trust Every Piece to Match

Subheadline: Why fabricators trust Bharat Stainless Steel Industries for structural pipe specifically.

Body: Because square and rectangular pipe is almost always welded or bolted into a fixed structure, dimensional consistency across an entire order matters more here than on any shape we sell, a single piece off-spec can throw off a whole frame's alignment after the fact, when it's expensive to fix.

Bharat Stainless Steel Industries holds tight batch consistency on every structural order, sources from Jindal Stainless, and confirms weight on the Dharam Kanta before dispatch.

12+ years supplying fabricators and workshops means we understand that a structural order isn't just about the material, it's about every piece behaving the same way on the welding table.

Section 5: Applications

Headline: Where Structural-Grade SS Pipe Gets Used

Subheadline: Where Bharat Stainless Steel Industries square & rectangular pipe actually gets used.

Body: Steel furniture manufacturing · elevator cabin frames · machinery and equipment structural framing · automobile machinery accessories · metro and railway fabrication, where square/rectangular profiles hold shape better than round pipe under certain load and welding conditions.

Section 10: FAQs

Headline: Frequently Asked Questions

Sub-headline: What structural pipe buyers usually ask before ordering.

Body:

FAQs 1: What is your stainless steel pipe dimensions and thickness chart?
Answer: Square and rectangular pipes range from 0.3mm to 8mm thickness across 6mm up to 12 inch crosssection. Share your project spec on WhatsApp for exact dimensions currently in stock.

FAQs 2: Can square or rectangular pipes be made as per my drawing?
Answer: Yes - for custom fabrication or structural orders "as per drawing," share your engineering drawing and we'll confirm dimensions, grade, and feasibility before quoting.

FAQs 3: Which grade is best for outdoor railings or furniture?
Answer: SS 304 (300-series) is common for outdoor and decorative fabrication because of weather-exposure corrosion resistance; SS 202 works for indoor, lower-exposure use at lower cost. We'll guide based on your exact environment.

FAQs 4: Do you supply in bulk for fabrication workshops?
Answer: Yes, we regularly supply fabricators and workshops in bulk. Message your quantity on WhatsApp for pricing and stock availability.

FAQs 5: How do I know the wall thickness is consistent across my whole order, not just the sample piece?
Answer: We confirm batch consistency before dispatch and weigh the full order on our own weighbridge, if there's a variance concern on a specific batch, tell us and we'll address it directly rather than argue the point after delivery.

Section 11: Bottom CTA

Headline: Have a Drawing Ready? Send It Our Way

Sub-headline: A WhatsApp message with your spec gets you a real answer - usually within two hours.
