QCred.in
Credit. Credibility. Confidence

STATUS & NEXT STEPS · CALL NOTE · 6 AUGUST 2026

Where we are — and what we need from you

CRM delivered · apps next · AI data path clear

Short note for tonight's discussion. The CRM and partner portal are delivered; Milestone 2 is half-paid (₹12,500 received, ₹12,500 still pending). This page lists what is live, what still needs your data or a decision, and what we need to open so both Partner apps can aim for the stores by ~20 August.

Prepared for	Prepared by	CRM demo	Money to date
QCred.in · Simply Insight Consultancy LLP	**24dev · Prabhas Raju**	**qcred-crm.vercel.app**	**₹27,500 of ₹1,00,000**

SECTION 01

Commercial & delivery status

Milestone	Amount	Status	Notes
1 · Kick-off	₹15,000	✓ Paid	Designs & architecture
2 · CRM live	₹25,000	◐ Partial	Admin + advisor/partner portal delivered. ₹12,500 received · **₹12,500 still not received**. Domain go-live still on your side (DNS).
3 · Android live	₹20,000	Next	Build ~5 days · Play Store review separate
4 · iOS live	₹20,000	Next	Same codebase · App Store review separate
5 · Source handover	₹20,000	Later	After both stores

Is most of the CRM done?

Yes. Both feedback rounds (nineteen numbered points) are actioned except training *videos* — the activation gate itself already blocks until training is recorded. Your team is reviewing modules; send any change list and it will be turned around the same way as the last two rounds.

SECTION 02

What you asked for — built vs waiting

Ask	Status	Detail
Full CRM + partner portal (Finoza-class)	✓ Done	Leads, partners, payouts, lender programmes, hierarchy, invites, reports, marketing…
Payout auto-calculated from lender module	✓ Done	Programme rate → maker–checker → your team transfers → UTR recorded. CRM does not move money.
Poonawalla product sheet loaded	✓ Done	11 LAP programmes in the lender module; Best Match ranks against them.
QGenie / website leads → CRM	✓ Done	Central-office allotment from site + chatbot.
Super Admin data downloads	✓ Done	Visible on list screens for Super Admin only.
Lender data-sheet format	✓ Sent	Template v2 Excel — fill and return; we load it.

Ask	Status	Detail
Narration box → best lender (Level 1)	✓ Live	Type a case in plain English; ranked lenders with reasons.
Payout grid + city tiers per lender (Level 2)	◐ Waiting on you	Sheets in template v2. Per-lender city classification as you preferred.
ML from past file outcomes (Level 3)	◐ Waiting on you	Need anonymised past files — see Section 03.
Training videos + tracked completion	◐ Scope later	Gate exists. Role-wise videos = small module once screens are final.
Voice note → speech-to-text → best lender	Phase 2	Same engine as Level 1 + STT. Not in the ₹1L app milestones — to quote separately.

SECTION 03

AI lender match — data still needed

Docs already with you: *AI data requirements* PDF + lender template v2 Excel + Poonawalla import note.

1 Narration → best lender

BUILT · NO NEW DATA

Plain-text case → Best Match. Live in the CRM. Voice later = this plus speech-to-text.

2 Payout + city tiers (per lender)

NEEDS YOUR SHEETS

Fill `Payout Grid` and `City Tiers (per lender)` in template v2. Each lender's own city classification — as discussed. Reloads in minutes when you send updates.

3 Learning from past data

NEEDS FILE HISTORY

Per past file (no names / phones): product · lender · amount · city · profile · CIBIL band · property type · **outcome** (Approved / Rejected / Disbursed / Withdrawn) · rejection reason · days to decision. Even 200–300 rows starts the model; CRM records outcomes going forward automatically.

SECTION 04

Partner apps — path to ~20 August

Build itself is about **five days**. Store live dates depend on **company developer accounts**, not coding.

Step	Owner	Why it matters
D-U-N-S number for Simply Insight Consultancy LLP	You (or confirm if you already have it)	Required for **both** Apple and Google *organisation* accounts. Free from Dun & Bradstreet. Can take days–weeks if new.
Google Play Console — **Organisation**	You + we guide	$25 one-time. Org account = **no** 12-tester / 14-day closed testing. Personal account forces that wait.
Apple Developer — **Organisation**	You + we guide	$99/year. Seller shows as the LLP (not the brand alone). App name can still be QCred Partner.
Add 24dev as Admin / Developer	You	So we can upload builds and handle review replies.
Build + submit + store review	Us + Google/Apple	Play typically 1–7 days · Apple typically 1–3 days after accounts are ready.

Target: both apps on stores by ~20 August

Realistic **if** D-U-N-S exists (or is applied this week) and org accounts are opened during the build. If enrollment starts only after the build, Play may still make it; Apple often slips.

SECTION 05

Decisions for this call

1 · D-U-N-S

Does Simply Insight Consultancy LLP already have a D-U-N-S number? If yes, share it. If no, we start the free application today.

2 · Who enrolls the store accounts?

Which designated partner has authority to bind the LLP, and which company email (e.g. info@qcred.in) should own Play + Apple?

3 · CRM domain

Confirm `crm.qcred.in` (or preferred host) — one DNS entry — so the team uses it on your address.

4 · Production database & document storage

Go-ahead to create these under QCred / LLP ownership (Mumbai region) so live customer data never sits in our demo account.

5 · Commercials still on placeholders

Partner share % · TDS % · bonus slabs (best-slab vs stacking) · BH vs SH in partner codes.

6 · Data sheets — when?

Timeline for Payout Grid + City Tiers (other lenders) and a first Past Files export from MIS?

7 · Team review

Any written change list yet, or still in progress? Voice match + training videos = Phase 2 quote, not absorbed into app milestones.

Our ask in one line

Confirm D-U-N-S / store enrollment owners tonight so app builds can start in parallel with your team's remaining review — and send the lender sheets whenever MIS is ready so Levels 2–3 of Best Match switch on without changing how anyone works.
