FEEDBACK STATUS · 7 AUGUST CHANGE-LIST · RECHECKED 8 AUGUST 2026

Your 7 Aug list — rechecked item by item

What is live, what needs you, and a few points to confirm

We opened your latest *Initial Feedback on Qcred Tech* document and walked every point from the **07 Aug 2026** section against the live CRM (`qcred-crm.vercel.app`). Earlier rounds (3 Aug / 5 Aug) were already answered in previous status notes — this pack focuses on the new list, with a short reminder of open items from before.

PREPARED FOR	PREPARED BY	DATE	LIVE AT
QCred.in Simply Insights LLP · Bobby	24dev Prabhas Raju	8 August 2026	qcred-crm.vercel.app

SECTION 01

Snapshot — 7 Aug list

Numbering matches the order of points in your Word document under “07 Aug 2026”.

Bucket	Count	Meaning
✓ Done	19	Built, deployed, and rechecked on live today.
◐ Partial	2	Working with a caveat that needs credentials or a small confirm from you (#2/#4 invite auto-send; #3 name correction path).
Open from earlier rounds	See §04	Training videos (3 Aug) still listed as content work — activation gate already exists.

Recheck method

Compared your downloaded doc (today) line-by-line → code + production database + live deploy. Confirmed live: role renames, Divisional Manager **team** scope, Unit Manager team follow-ups, partner **Approving supervisor** field, document View-in-tab, IST follow-up times, Edit lead for Unit Manager+.

One setting you must complete for team views to work

Employees → Reports to is the reporting tree. Unit Manager / Divisional Manager “team” visibility walks that tree. If nobody reports to a manager, their team list looks empty even though the feature is live. Please map each field person to their supervisor once (or we can do it with you on a short call).

SECTION 02

7 Aug points — status (1–11)

Short “what we did” so you can tick on your side while testing.

#	Your point	Status	What is live
1	Block duplicate users (same mobile / PAN)	✓ Done	Create / invite refuses duplicate mobile or PAN with a clear error. Open invites also checked.
2	On create — email / WhatsApp to start registration + KYC	◐ Partial	Invite link is created; CRM **auto-opens WhatsApp** with the message + link. Fully silent auto-send (no click) needs Meta WhatsApp + Resend keys from you — see §05.
3	Provision to correct a wrongly entered name	◐ Partial	The person can correct their own name on **Profile**. Dedicated Super-Admin “rename employee” on the Employees grid is not a separate control yet — confirm if you want that (§05).
4	Invite link: trigger email / WhatsApp (don’t only copy)	◐ Partial	Same as #2 — deep-link WhatsApp works today; silent email/WhatsApp when credentials are provided. Invite URL format fixed (hex tokens on live domain).
5	Designation + Location + Direct / Indirect on create	✓ Done	Required on Add employee; stored on user; shown on Employees list.
6	Rename / add roles (Distribution Head, SBH Direct/Indirect, Unit Manager, Connector, Channel Partner)	✓ Done	All renames + new roles live in production DB and CRM role pickers.
7	“Share with partner” — what is it / who is the partner?	✓ Done	UI explains: unchecked = internal note; checked = visible to the **sourcing partner on that lead** only (not every partner). Disabled when no partner linked.
8	Other documents — space to name, then upload	✓ Done	When type = Other, a free-text name is required; stored/shown as **Other — <name>**.
9	Supervisor download + email pack / lender RM contact	✓ Done	Lead → Documents: View / Download. Email supervisor (mapped or pick staff). Per application: pick/add Lender Relationship person, then email pack. Email needs Resend key for fully automatic send.
10	Follow-up — notify supervisor / lead originator?	✓ Done	In-app notification always. Email / WhatsApp when credentials set. Includes lead no, customer, due time, link.
11	Two statuses — lender application vs top-right — how different?	✓ Done	UI labels: **Lead pipeline** (overall file) vs **Lender case status** (per bank). Clarification only — both still needed.

SECTION 03

7 Aug points — status (12–21)

#	Your point	Status	What is live
12	Edit the lead — Manager and above	✓ Done	**Edit lead** for Unit Manager, Divisional Manager, SBH Direct/Indirect, Distribution Head, Leader, Super Admin. Connectors / Supervisors / RMs cannot change master fields.
13	“ADMIN CRM, WHY?” + QCred logo incorrect	✓ Done	Removed Admin CRM label. Official wordmark; navy sidebar uses on-dark mark (white Q/.in + green Cred). Tagline: Credit. Credibility. Confidence.
14	Role should not be visible — Super Admin only	✓ Done	Sidebar role/scope line and Profile permissions list: Super Admin only. Others see name + Sign out.
15	Follow-up timestamp incorrect	✓ Done	Picker treated as IST (+05:30). Existing wrong rows corrected once. New schedules match the clock you pick.
16	Unit Manager — Team follow-ups, not his own	✓ Done	Dashboard / todo: **Team follow-ups due** = subordinates only (reporting tree minus self). Owner name shown. Needs Reports to mapping.
17	UM self-sourcing lead — verification by his supervisor	✓ Done	Maker ≠ checker: whoever **created** the lead cannot Verify/Reject its documents. Supervisor (or other verifier) must.
18	Docs ask to save — open in separate window to view	✓ Done	Button is **View** (new tab). Files served inline so PDF/image opens in the browser.
19	Dashboards: “Teams document verification pending”	✓ Done	Todo / Needs attention label is now **Team document verification pending**.
20	Partner appointment → approval to selected supervisor	✓ Done	Add partner requires **Approving supervisor**. Only that supervisor (or all-scope Checker/Admin for self-register/legacy) can Approve/Reject. Their queue shows appointments waiting on them.
21	Divisional Manager — only org / reporting team (not all)	✓ Done	DM **dataScope = team**. Employees / leads / partners filtered to reporting line + appointments under them. Needs Reports to mapping.

How team visibility works (items 16 & 21)

Think of **Reports to** as the org chart. A Divisional Manager sees himself + everyone who reports to him + people under them. Example: Priya reports to Ramesh (DM); Amit reports to Priya → Ramesh’s team = Ramesh + Priya + Amit. If Amit’s Reports to is blank, Ramesh never sees Amit’s files — that is expected, not a bug.

SECTION 04

Earlier rounds — already covered

Your Word file also carries 3 Aug and 5 Aug points. Those were answered in prior status PDFs (3 Aug evening + 6 Aug call brief). Short reminder only:

- **Hierarchy / team-only data, employee approval, partner access grid, RM Partner/Payout crashes** — built (3 Aug evening).
- **Super Admin CSV downloads, QGenie → checker allotment, lender add/approve for central, lender hierarchy UX** — live / in use.
- **Payout module + lender programmes** — explained earlier; CRM calculates, does not move money.
- **Invite / activation links** — fixed on live domain; use current invite links only.
- **Training videos by role** — still content work. The CRM already blocks partner activation until training is recorded; videos/voiceover are a separate production item if you want us to make them.

SECTION 05

Points for you — action & confirmations

One-line answers are enough. These unblock polish and fully automatic messaging.

A · Map “Reports to” for field staff

Without this, Unit Manager / Divisional Manager team dashboards cannot show the right people. Can we schedule 20 minutes to map your current org on Employees?

B · WhatsApp + email credentials (for silent auto-send)

Needed on Vercel: **WHATSAPP_TOKEN**, **WHATSAPP_PHONE_NUMBER_ID**, **RESEND_API_KEY** (+ optional RESEND_FROM). Until then: WhatsApp opens with pre-filled message (works); email uses mailto / Resend when key exists. Do you want us to stay on the open-WhatsApp flow, or will you share Meta + Resend credentials?

C · Who may rename an employee after create?

Today: the employee can fix their own name on Profile. Should Super Admin (and/or Unit Manager+) also edit names on the Employees screen? Yes / No — if Yes, which roles?

D · Training videos

Do you want 24dev to produce short screen-record + voiceover videos per role, or will QCred supply content and we only host / gate them?

Where to test

Live CRM: **https://qcred-crm.vercel.app** · Times shown in **IST**. After mapping Reports to, log in as Unit Manager / Divisional Manager and check dashboard queues, Employees list, and Partners pending approvals.
