CHECKED AGAINST THE LIVE CRM · 2 SEPTEMBER 2026

Your Monthly MIS dashboard — five decisions

We read the file. P&L in the CRM is not this yet. Please confirm only the points below.

You sent **QCred Monthly MIS Dashboard** (Dashboard, Monthly MIS, Target Setup, Team Master, Employee Master, Lender Master). We treated the rupee examples and placeholder salaries as illustrations — we are not asking you to re-confirm those numbers. These five answers decide how P&L should look on the CRM and the apps.

Your file	Checked against	Prepared by
QCred_Monthly_MIS_Dashboard.xlsx	**crm.qcred.in · live P&L**	**24dev · Prabhas Raju**

SECTION 01

What we read from your Dashboard

For a salaried (Direct) person, one month:

Incentive is 50% of only the slice of net margin **above** salary × target multiple. Below that line, incentive is zero and salary is still paid — so company profit goes red. Indirect / channel partners have no salary: they take 90–95% of fees, QCred keeps the rest.

A supervisor (Durgesh in the file) sees each person under him, plus one combined line — fees in, salary spent, profit including the losses.

SECTION 02

What the CRM shows today

Your Dashboard	Live CRM	What we found
Company profit on each person (returned – spent, can be red)	**Not this**	CRM P&L is take-home vs target (salary × multiple). A slow month still shows full salary. There is no “QCred lost money on him” column.
Channel ~90% taken out before salary	**Not on P&L**	Generated commission is the full lender %. Channel / partner payout sits on a separate Payouts screen.
Supervisor combined profit of everyone under him	**Partly**	The reporting tree rolls up **generated** commission. It does not add up all salaries under him and show one company profit.
Indirect: 90–95% out, rest to company, no salary	**Close**	Partners already have a share %. CRM shows their take-home of generated, not “what QCred kept after paying them”.

In plain terms

Your file is a **company P&L**. The CRM today is a **paycheck screen**. We will not change P&L until you tick the five questions on the next page.

SECTION 03

Please confirm only these

One-line answers are enough. We are not asking about the sample rupees, placeholder salaries, or dummy customer names in the workbook.

1 · Is the screen company profit, not take-home?

Should each employee (and each person under a manager) show **returned to QCred vs spent on him**, with red when spent is higher — the way your Dashboard column “Company Profit” works?

A Yes — that is the P&L. Take-home can stay as a second line if needed. **B** No — keep today’s take-home vs target.

2 · What is “returned” before we subtract salary?

In your sheet, fees come in, then ~90% channel payout comes off, then salary. In the CRM today, generated is the **full** lender %.

A Returned = fees minus channel / partner payout, then salary. **B** Returned = full lender commission, salary compared to that.

3 · Which files count in the month?

Your Dashboard currently sums every Monthly MIS row for that person and month (Lead Generated, Logged In, Sanctioned, Disbursed). The CRM P&L counts **only disbursed**.

A Disbursed only — money that actually came in. **B** All files logged that month, as the Dashboard does now.

4 · How far does a manager’s combined number go?

In the file, Durgesh’s rollup is people whose Supervisor cell is Durgesh (one level — 17 Directs). You also said a role-7 should see everyone under him combined.

A One level — only direct reports, plus their own combined total. **B** Full tree — every employee under him, however deep, in one combined profit.

5 · Indirect / DSA — same as the 90–95% table?

Channel partners: no fixed salary, payout 90–95% of fees, QCred keeps the rest. ADS and Dhananjay in the CRM already have a share %. Should their P&L be this residual (what the company kept), not a salary-style take-home?

A Yes — Indirect table as in your Dashboard. **B** Different for some partners — we will say who.

What we need back

1A/B, 2A/B, 3A/B, 4A/B, 5A/B — WhatsApp is enough. Once those five are ticked we will change P&L on CRM and the apps to match, including red when QCred is down on a person. We will not start that build on an assumption.
