LENDER DATA IMPORT · 4 AUGUST 2026

Your Poonawalla sheet is loaded

The product sheet you shared (QCred_LAP_Product_Features_Poonawala.xlsx) has been imported into the CRM — as its own header says, as the primary reference. Every sheet was read; here is exactly what went where, verified live, plus two small questions.

Sheet by sheet

Your sheet	Status	Where it lives in the CRM now
Program Features	✓ Imported	All **11 LAP programmes** in the lender module — assessment basis (EBITDA, Gross Profit, Gross Receipts, GST, Banking, rental…), FOIR where published, target segments, property types, tenure, and each programme's conditions in its notes.
Max Loan Amount Grid	✓ Imported	Each programme carries its tier-wise maximums exactly as published — Standard Income `₹25 Cr` metro / `₹7.5 Cr` tier 2 / `₹3 Cr` tier 3&4, down to LIP's flat ₹2 Cr — plus the minimums including LRD's ₹1 Cr and Pure Rental's ₹75 L exceptions.
LTV Grid	✓ Imported	The property-wise grid (Residential 80 · Commercial 75 · Industrial 55 · Land/Plot 50 · Specialised 65) on every programme; Low LTV carries its own 40% / 35% ceilings.
GST Margin Grid	✓ Captured	Manufacturer 12% · Services 15% · Retailers 10% · Wholesalers 5% — recorded on the GST Programme where your team reads it while working a file. (Making it *compute* eligibility is possible — say the word and we'll scope it.)
Sales Team Contacts	✓ Imported	The full directory — NSM, Product Head, and all zonal & regional managers, **23 contacts** with phone and email — now lives under the lender in the CRM, tap-to-call. When a file is stuck, who to chase is one tap away.
Branch Classification	◐ Read	The Metro / Tier 1 city list is noted but not yet applied as automatic data — one question below decides how it should work.

Verified live, and working downstream

The Best Match engine now ranks cases against the real 11-programme library. Test case: a ₹5 Cr industrial-property file correctly ranks the Standard Income programme first and rules out LIP at its ₹2 Cr cap — with the reason shown. And this confirms the pipeline for the next 100 lenders: fill the Excel template, send it, it loads the same way.

Two small questions

1 · Payout percentages

Every Poonawalla programme is loaded with the payout **blank** — deliberately. What Poonawalla pays QCred is your commercial term, not something in their product sheet. Add the figures in Manage Lenders, or send them and we'll load them.

2 · The branch classification

Is the Metro / Tier 1 list Poonawalla's own, or the classification you want applied across **all** lenders? If the latter, we'll make city → tier automatic — so booking a Surat case applies Tier 1 limits by itself instead of the team picking the tier manually.
