Technology — Architecture

Three doors in. One platform. Every rupee released under maker-checker.

QCred.in
Credit. Credibility. Confidence.

USER CHANNELS

- **Customer app**
  Apply · track · documents · offers
- **Partner app**
  Android + iOS · lead to payout in the field
- **Web admin console**
  Staff control room with maker-checker

QCRED PLATFORM

- **CRM & origination**
  18-stage pipeline
- **Best Match**
  Ranked lender shortlist
- **Construction Finance**
  100-pt readiness score
- **Money · maker-checker**
  Payouts · GST / TDS
- **P&L & analytics**
  Book · commission

LENDER NETWORK

- **Banks**
  Programmes on file
- **NBFCs / HFCs**
  Poonawalla · ABFL · IIFL +
- **Apply links**
  Straight into lender portals
- **CF pack**
  Scored PDF after GO

ONE STACK | Vercel · Neon Postgres · encrypted files · Expo Android + iOS

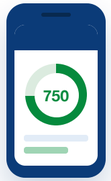

SECURE BY DEFAULT | HTTPS · JWT · RBAC · full audit trail

USER CHANNELS

Three doors, one login system

Customer, field partner and staff all land on the same platform — nothing lives in spreadsheets.

QCred.in
Credit. Credibility. Confidence.

Customer app

End customer · qcred.in + app

Apply
Product forms for every loan type on the book

Track
Live file status through all 18 stages

Documents & offers
Upload KYC once, see matched offers

Partner app

Field partners · Android + iOS

Lead to file
Capture a lead and push it into the pipeline from the field

Camera KYC
Shoot PAN / Aadhaar on the spot — straight to the vault

Payouts & team
See earnings and the team tree — screenshot-blocked

Web admin console

Staff · crm.qcred.in

Maker-checker
Every payout, activation and rate change needs a second approver

Leads & partners
Full pipeline, org tree, verification queues

Payouts & P&L
Commission engine, GST / TDS, exports for the accountant

PLATFORM CORE

What the engine actually does

Six modules, one database — a file moves from lead to lender without leaving the system.

QCred.in
Credit. Credibility. Confidence.

CRM & origination

Leads, partners, employees and an 18-stage file pipeline with an org tree that controls who sees what.

Best Match engine

Ranks lenders and programmes for each file from the live catalogue — the shortlist, in seconds.

Construction Finance desk

A 100-point lender-readiness score across 7 factors with red-flag overrides. Every builder file leaves as GO, HOLD or DECLINE — with a bank-ready PDF.

CF pack to lender

After GO, the scored pack goes to the bank. The bank still sanctions — QCred owns the screening.

Money with maker-checker

Disbursements, payout charts, GST / TDS. Nothing is released until a second person approves.

P&L & analytics

Book, commission and org drill-down against salary × target — the number an investor can audit.

DOCUMENTS & KYC | **Capture → verify queue → activation gate. A file does not move until it is clean.**

Built to be audited

Control layer on every request, lender network on the way out, one cloud stack underneath.

Qcred.in
Credit. Credibility. Confidence.

Control on every request

Data & control layer

Identity & access

JWT sessions, roles, own / team / all data scopes

Document vault

Auth-gated, expiring links — nothing public

Audit trail

Who, what, when, before / after on every change

Lender network

The way out of the platform

Banks & NBFCs / HFCs

Poonawalla, ABFL, IIFL and the rest of the book — programmes and apply IDs on file

Apply links

Files go straight into lender portals with tracked login IDs

CF pack after GO

Scored construction-finance PDF, ready for credit committee

One cloud stack

No servers to babysit

Vercel

Next.js · crm.qcred.in · auto-scaling

Neon Postgres + Blob

One database of record · encrypted document store

Expo EAS

Native Android + iOS builds · screenshot block on app

SECURITY | End-to-end HTTPS · JWT · role-based access · full audit trail · FLAG_SECURE on mobile
