VALUE — WHY ₹80,000

One builder file at 0.25% of ₹2 Cr is ₹50,000 to QCred. At 0.5% it is ₹1,00,000. This desk is how you sit with a lender with a scored, auditable file instead of a WhatsApp Excel. ₹80,000 is inside one strong file, or two ordinary ones.

IF QCRED CLOSES	TAKE	TO YOU
One ₹2 Cr file	0.25% facilitation	**₹ 50,000**
One ₹2 Cr file	0.5% facilitation	**₹ 1,00,000**
This BRD build	One-time, full scope, month-end delivery	**₹ 80,000**

100-point scorecard	Seven factors (10 / 15 / 10 / 10 / 20 / 20 / 15). Sub-factor rules as in BRD §17. Live ratios. Users cannot type the final score. Missing data scores zero.
Red flags + decision	Title, approvals, NPA/recovery, settlement/write-off, cover <1.00x, CF >60% TPC. Bands: 80+ GO · 65–79 CONDITIONS · 50–64 HOLD · <50 DECLINE. Red flag blocks unconditional GO AHEAD.

BRD AREA	WHAT WE BUILD ON CRM.QCRED.IN
Review + docs stage	Positives / concerns / conditions. After GO, collect the full next-stage pack from your BRD: legal/title, RERA and approvals, project cost/cash-flow/fund-flow, valuation, bank statements, financials, GST / ITR, bureau, existing-loan papers, lender-specific docs.
Workflow + roles	Draft → Submitted → Under screening → Correction → GO / Conditions / Hold / Declined → Exception review → Documentation. Originator, business, analyst, approver, operations, admin as in BRD §6.
Controls	Validations §23 · audit trail §26 · notifications §29 · PDF screening report §36 · MIS §27 (funnel, score bands, originator, city, red flags, funding, cover, credit, docs, exceptions) · RBAC · configurable rule version with historical lock.

ONE DECISION YOU MUST SIGN THIS WEEK — BRD §34

Your scorecard has four weight mismatches (Promoter 10 vs 15, Sales 10 vs 15, Funding 20 vs 15, Security 20 vs 14). We cannot build two maths at once. You sign one line: either we **normalise sub-factors to the factor weights**, or you tell us the extra points. Until that line is signed, scoring cannot go live. Everything else starts on the advance.
