24dev

QUOTATION

#24D-2026-QC03 · Revised July 28, 2026

Payment schedule as agreed with QCred

PROJECT QUOTATION — PHASE 2

QCred CRM Platform
Web Admin CRM + QCred Partner App (Android & iOS)

Your operations platform, matched module-for-module to the reference application you shared (demo CRMs + walkthrough videos studied in full) — built custom on the QCred brand, integrated with your live website and its leads.

PREPARED FOR

QCred.in
info@qcred.in

PREPARED BY

24dev — Web Development Agency
Prabhas Raju · prabhasraju1817@gmail.com

01 SCOPE — MATCHED TO YOUR REFERENCE, MODULE BY MODULE

WEB ADMIN CRM (INTERNAL TEAM)

Dashboard	Total leads, approvals %, disbursed, payouts — live KPIs
Advisors	Onboarding, KYC review, approve / suspend — maker-checker
Leads	All-product pipeline, status workflow, filters, assignment
Disbursements	Own + advisor disbursement tracking, payout status
Payouts	My / advisor payouts, payout charts, release via maker-checker
Reports	Overview, lead-wise, product-wise · CSV / Excel export
Products	Manage products offered to partners
Employees	Staff accounts, roles (maker vs checker), audit trail
Notifications	Broadcast to advisors — in-app + push
CRM settings	Payout chart uploads, advisor banners, branding, contacts

QCRED PARTNER — ADVISOR PORTAL + APP (ANDROID & IOS)

Dashboard	Team, leads, approvals, disbursed, payout earned
Add Lead	Product-wise lead forms (all 9 products, like reference)
My Leads	Status tracking, filters, lead reports
Team	Invite links, sub-advisor network, team lead visibility
Payouts	Payout overview + product-wise payout charts
Marketing tools	Branded banners & creatives to share
Tools	Pincode serviceability + company category search
Lender docs	Policy documents & payout charts per lender
Profile & KYC	Bank details, PAN / KYC uploads for payouts
Mobile apps	All of the above as native apps on Play Store & App Store — push notifications, screenshot-blocked (FLAG_SECURE)

Also included: partner logins from qcred.in (website → CRM, one system) · partner applications from the website chatbot flow straight into the CRM · WhatsApp OTP validation for partner onboarding (messaging charges at actuals) · full audit trail on sensitive actions.
QCred customer app (end-customer, direct business) — planned next phase, quoted separately when you're ready; the backend built here already supports it.

02 COMMERCIALS

COMPONENT	PRICE
Web Admin CRM — internal console + advisor web portal, maker-checker, payouts, reports	**₹35,000**
QCred Partner — Android — full app, Play Store launch	**₹35,000**
QCred Partner — iOS — App Store launch incl. review handling	**₹30,000**
Complete platform	**₹1,00,000**

03 PAYMENT — MILESTONE-LINKED, YOU PAY AS THINGS GO LIVE

MILESTONE	WHAT YOU HAVE IN HAND	PAYMENT
Kick-off	Project starts — designs & architecture shared within 48 hours	**₹15,000**
CRM live	Admin console + advisor portal live on your domain, team using it	**₹25,000**
Android live	QCred Partner live on the Play Store	**₹20,000**
iOS live	QCred Partner live on the App Store	**₹20,000**
Source code handover	Complete source code, repositories, deployment & admin documentation — walked through in a scheduled handover session	**₹20,000**
Total		**₹1,00,000**

04 TIMELINE

- **Development complete in 10 working days** from kick-off — CRM first (team starts using it early), app builds follow on the same backend
- Store publication after build: Google Play review typically 1–7 days, Apple review 1–3 days — these windows are Google's/Apple's, not ours; we handle submissions, listings and any review responses
- Progress demo every 2–3 days on WhatsApp — you watch it come alive
- Play Console and Apple Developer accounts are opened at kick-off — Apple's business verification runs in the background and can take a few weeks, so starting it on day one keeps the launch dates clean. We handle the setup with you.

05 BILLED SEPARATELY — AT ACTUALS, IN QCRED'S ACCOUNTS

ITEM	APPROX. COST	WHEN
Google Play developer account	US $25 (~₹2,100) one-time	Before Android launch
Apple developer account	US $99 (~₹8,500) per year	Before iOS launch
Hosting, database & push infrastructure	₹0 – 2,000 / month at launch scale	From go-live
SMS / WhatsApp OTP & alerts	Provider rates (~₹0.15 – 0.35 / message)	When enabled
GST	As applicable on invoice	—

06 SUPPORT, OWNERSHIP & WHY CUSTOM

- **2 months free maintenance** after launch — covering the CRM, both apps AND your website: bug fixes, minor changes, priority support
- 100% source code ownership — assigned milestone-by-milestone on payment (see section 07); no licence or renewal fees, ever
- Stack: Next.js + PostgreSQL (CRM, same stack as qcred.in) · React Native (one codebase, both stores)
- Unlike the white-label template (Android-only, resold to every DSA, yearly renewal): this is custom on the QCred brand, integrated with your live website's leads and partner chatbot, and it grows — customer app, LOS, bureau/KYC integrations plug into this core when you're ready
- Two revision rounds per milestone; new modules quoted before work begins

07 IP, OWNERSHIP & TRANSPARENCY — AS REQUESTED BY QCRED

- **100% ownership of all custom-developed IP by QCred** — ownership of each deliverable assigns to QCred milestone-by-milestone, effective on payment of that milestone
- **Git repository created and owned by QCred from project inception** — 24dev works as a collaborator in QCred's repository; full commit history visible at all times
- **No vendor-controlled accounts** — cloud, database, hosting, app-store and domain accounts are all created in and owned by QCred; all provider charges billed to QCred directly
- **No compiled-code-only deliveries** — complete source code and build scripts delivered in the repository at every milestone
- **Knowledge transfer & documentation with every milestone** — setup, deployment and admin guides included; a milestone is deemed accepted unless written objections are shared within 5 business days of delivery, acceptance not to be unreasonably withheld
- **No technical or commercial vendor lock-in** — open, industry-standard stack (Next.js, React Native, PostgreSQL); any competent team can maintain the system
- **Reusable frameworks disclosed** — any 24dev reusable components used are disclosed, with a perpetual, royalty-free licence to QCred to use them as part of the delivered solution
