QUOTATION #24D-2026-QC02
July 17, 2026 · Valid 15 days

PROJECT QUOTATION

QCred Technology Platform
Web Admin CRM + QCred Partner App

Your operations core, exactly as scoped: the web admin console with maker-checker workflows (internal team works on web), and the QCred Partner app on Android and iOS. Customer app reserved as a later phase. Custom-built on the QCred brand, integrated with your live website.

PREPARED FOR

QCred.in · Simply Insight Consultancy LLP
info@qcred.in

PREPARED BY

24dev — Web Development Agency
Prabhas Raju ·
prabhasraju1817@gmail.com

01 Scope — the two products

QCred Partner

PARTNER APP · ANDROID + IOS

- Lead — product-wise lead forms (9 products)
- Apply & Track — lead status, filters, reports
- Team — sub-advisor invites, team tree
- Payouts — commission overview, payout charts
- Tools — marketing creatives, pincode & company search, lender policy docs
- Profile & KYC — bank details, PAN upload

Web Admin Console

YOUR OPERATIONS TEAM

- Dashboard — advisors, leads, approvals, disbursals, payouts
- Advisor onboarding & KYC — **maker-checker**
- Lead pipeline — status workflow, assignment, filters
- Payout engine — release via **maker-checker**, audit trail
- Reports — lead / product / advisor-wise, CSV export
- Products, employees & roles, broadcast notifications

QCred customer app — reserved for later, priced now: when you're ready for the end-customer app (apply / track / documents / offers), it plugs into this same backend with no rebuild — **₹35,000** Android or **₹45,000** Android

+ iOS.

Maker-checker, built into the core: every sensitive action — advisor approval, payout release, lead status override — is raised by a maker and takes effect only after a checker approves it, with a complete audit trail of who did what and when.

02 Your architecture, sequenced

Mapped against the Technology-Architecture you shared and both reference demo CRMs (explored module by module). This quotation delivers the User Channels and platform core — the layers that run the business today. The rest is sequenced so nothing is rebuilt later.

PHASE	FROM YOUR ARCHITECTURE	STATUS
This quotation	Partner App · CRM (lead management) · Web Admin Console · Analytics · Access Control & Security	Full build, 7 weeks
Next phase	Customer App · LOS workflow · Lender Dashboard · Collections · Onboarding chatbot	Quoted when core is live
Integration phase	Credit Bureau · CKYC · DigiLocker · API Banking · AI Lead Engine · Fraud Engine · Insurance	Needs QCred's commercial agreements with the providers (bureau, NSDL, AA); we integrate as each is signed

03 Commercials

COMPONENT	INCLUDES	PRICE
Web Admin CRM	Admin console + partner web portal (internal team on web), maker-checker core, payout engine, reports, roles & audit trail, WhatsApp OTP validation for leads, integrated with qcred.in	**₹30,000**
QCred Partner — Android	Full partner app on Play Store — leads, team tree, payouts, tools, push notifications, screenshot-blocked (FLAG_SECURE)	**₹45,000**
QCred Partner — iOS	Same app on the App Store — review handling included	**₹30,000**
Complete package — Web CRM + Partner app on both stores		**₹1,05,000**

Single-engagement package (everything together): **₹95,000**

Reference point: the white-label template vendor charges ₹89,000 for Android + web CRM — no iOS, no source code, the same template resold across the market, with yearly renewal fees typical. For ₹6,000 more, this engagement adds **iOS**, a custom build on the QCred brand, integration with your live website, and **100% source code ownership with no recurring licence — ever**.

04 Delivery & payment

MILESTONE	YOU SEE	PAYMENT
Kick-off	Architecture, designs and project plan; build starts	**30%**
Week 3 — CRM preview	Admin console + partner portal live on a preview link	**30%**
Week 5 — App preview	Partner app installable on your phones (test build)	**20%**
Week 7 — Handover	App live on both stores, CRM on your domain, source code transferred	**20%**

Weekly demo every Friday throughout. Two revision rounds per milestone included; new modules or scope additions are quoted separately before work begins.

05 Third-party costs — separate, at actuals, in QCred's accounts

ITEM	APPROX. COST	WHEN
Google Play developer account	US $25 (~₹2,100) one-time	Before Android launch
Apple developer account	US $99 (~₹8,500) per year	Before iOS launch
Hosting, database & push infrastructure	₹0 – 2,000 / month at launch scale	From go-live
SMS / WhatsApp OTP and alerts	Provider rates (~₹0.15 – 0.35 per message)	When enabled
GST	As applicable on invoice	—

06 Ownership & support

- Stack: Next.js + PostgreSQL (web CRM, same stack as qcred.in) · React Native (both apps, one codebase each)
- Role-based access control, encrypted data at rest and in transit, full audit logging
- 100% source code ownership transfers on final payment; no licence or renewal fees
- 30 days of post-launch bug-fix support included; Care Plan available at ₹7,999/month thereafter (priority support, monitoring, minor enhancements)
